

Žilvinas Akelis

Frontend Software Developer

Kaunas, Lithuania · +370 633 84741 · zilvinasakelis@yahoo.com · linkedin.com/in/akelis-zilvinas · github.com/MethGuys

PROFILE

Frontend-leaning software developer with 4+ years building a production ERP platform for a manufacturing company — lead contributor on a 7-person engineering team (1,500+ of roughly 2,800 platform commits). Specializes in complex, stateful UIs: dynamic configurator/form systems, data visualization, and document-generation pipelines. Strong Vue.js foundation in component architecture and state management, now extending into React and TypeScript.

EXPERIENCE

Frontend Software Developer — Ryterna Group, ERP Platform

Jan 2022 – Present

Vue.js ERP system for a windows/doors/gates manufacturer, built with a 7-person engineering team.

- Architected a rule-driven product configurator engine spanning 16+ pluggable controller types (sliders, colour pickers, dependency logic, add-on modules), powering real-time pricing and visual previews for configurable manufactured products.
- Engineered an automated PDF quote/confirmation pipeline that mirrors the live order UI exactly in both pricing logic and visual output, removing manual discrepancy checks.
- Owned an 86-module Vuex state architecture and the validation framework behind a multi-step order flow, including multi-file upload handling.
- Bridged frontend and shop-floor systems — integrated WebSocket/Telnet-based equipment communication into the configurator alongside backend and production engineers.
- Drove roughly 1,500 of the platform's 2,800 commits as the most active contributor, operating inside a 7-person team's shared architecture and review workflow.

SKILLS

Frontend & UI	Vue.js, JavaScript (ES6+), React, TypeScript (in progress), HTML5, CSS3, Tailwind CSS, Bootstrap
Architecture & State	Vuex at scale (86-module store), component architecture (400+ components), plugin-style controller systems, i18n / multi-locale
Integration & Tooling	REST APIs (Axios), WebSocket / Telnet integration, PDF generation pipelines, Git

EDUCATION

Automation Engineering

Kaunas University of Technology

Courses

Full-Stack Web Development
freeCodeCamp

Languages

Lithuanian — native
English — professional working proficiency

Interests

Dog training, piano, sports, technology
